WEEK 2 • CHARACTER: TOOMAS KASK

Team: Daria • Maria • Marvis • Reio

Data-Quality Summary Report

KEY FINDINGS

SALES

988 records (9.8%) missing customer_id

Duplicates, dates, and totals otherwise fully clean.

CUSTOMERS

3 issues found across the customer table

128 duplicate emails, 380 missing emails, 54 city spellings for 12 real cities.

PRODUCTS

12 duplicate product names (24 rows)

Pricing, NULLs, and category otherwise fully clean.

CROSS-VALIDATION

0 orphan customer or product references

592 dormant customers, 12 unsold products — flagged for review.

BIGGEST SURPRISE

Despite real issues in specific areas, every relationship between the tables held up perfectly — zero broken customer or product references anywhere in sales. Data problems were narrow and specific, not structural.

RECOMMENDATION FOR TOOMAS

Trustable once city and email formatting are standardised. customer_id gaps should be investigated first (9.8% of sales). Duplicate emails/names and dormant customers/products need manual review before any merge or deletion.

MISSING DATA

True email for 380 customers is unknown. We can't confirm whether shared emails or product names are genuine duplicates, or why 592 customers and 12 products show no activity — business context is needed.

PRESENT · 1:15–1:25

Preparing the Demo

An outcome presentation, not a description of the process — one sentence each.

CONCLUSION

Our core data links together correctly — zero broken references between sales, customers, and products — but several fields still need cleanup before the numbers can be fully trusted.

DECISION

Toomas should hold off on high-stakes reporting decisions until the missing customer_id records are investigated and the duplicate emails and product names are manually reviewed.

WHAT SURPRISED US

Despite real quality issues in specific columns, every relationship between the three tables was completely intact — not a single orphaned reference anywhere in the data.

Session 3 note: this same outcome presentation will need to fit 3 minutes — practise the pacing.
